

HEMET PROFESSIONAL DEVELOPMENT SERVICE CENTER

The Hemet Unified School District had outgrown its existing administrative facilities. The concept of a Professional Development Service Center (PDSC) was developed to not only meet the District's administration, maintenance and operation needs, but also to provide quality professional development for the teaching profession and provide for the continuing education of the community as well as community events. Included in this space are an administration room, conference rooms, a warehouse and a transportation center.

Square Feet: 72,700
Construction Cost: \$17,500,000
